QUOTATION

1.8m Direct Fabric Printer MT-TX1805 DE

	Adopts Heavy Duty Machine Body(Double stands), net weight is 350kgs Adopts THK 20mm low noise guide rail with dual sliders Adopts Italy MEGADYNE Belt Adopts Anti-collision performance Adopts Continuous ink supply system, Big Bulk ink supply system is optional Adopts the latest program in the boards there is error tips automatic Adopts Micro-Switch beside the carriage, that control the infrared heater working intelligently Adopts Japanese NSK long life bearing and screw Adopts Germany Igus Data cables	
	Model No.	Unit Price
	1.8meter 2 head Coded Epson DX5 Printer + Heater	
	1.8meter 2 head Original Uncoded Epson DX5 Printer + Heater	AVAILABLE
	1.8meter 3 head Original Uncoded Epson DX5 Printer + Heater	
Standard-equipped 1) Maintop RIP Software 2) Big bulk ink supply system 3) Heater Optional: Photoprint rip software USD500		
Sublimation Ink : USD20 per liter; Pigment Ink: USD60 per liter		

Remark:

1. Payment: 100% T/T
2. Insurance & shipping: To be paid by buyer
3. Delivery time: in 7 days
4. Warranty: one year warranty except the ink supply system, such as print-head, damper etc.
5. **If only use our ink on our machines, we will provide life-long time warranty!**

Specification of MT-TX1807DE/MT-TX1805DE Direct Fabric Printer

Print Head	Epson DX7 head/ Epson DX5 head
Print Width	1800 mm
Max. Print Thickness	5mm
Ink Droplet Size	1.5-21pl
Printing Resolution	1440 DPI
Printing Speed (2 head)	2PASS: 50sqm/h; 4PASS: 34sqm/h; 6 PASS: 25sqm/h; 8 PASS: 13.8sqm/h
Printing Speed (3 head)	2PASS: 65sqm/h; 4PASS: 44.5sqm/h 6 PASS: 32.5sqm/h; 8 PASS: 17.8sqm/h
Color	Cyan, Magenta, Yellow, Black
Ink Type	Sublimation Ink/Pigment Ink
Drying	Fan, infrared heater is optional
Ink Supply System	CISS (Continuous Ink Supply System), Big bulk ink supply system is optional
Auto Cleaning System	Auto Cleaning System With Anti Clogged Flash Spray & Moisturizing Function
Feeder&Take Up	YES
Max Loading Weight	70kgs
Working Media	not elastic fabric or a little elastic fabric, such as cotton, linen, polyester, nylon.
Media Adsorption	Sucking system With Adjustable Strength.
Three Heating Sections	3 heater for Pre-Heater, Printing Bed Heater, Rear Heater
Print Interface	USB 3.0
RIP Software	Maintop , Photoprint is optional, others is customized
Control Software	Print Console
Operation System	MS Windows XP & Windows 7
Input Power	AC 220V 50Hz
Work Environment	Normal temperature 18-35°C, Humidity 40%-70%
Weight	300kg/400kg (Printer) ; 450kg/520kg(Heater), 40kg/60kg(Filter Fans)
Printer Dimension	L3140*W880 * H1320mm
Packing Dimensions	L3360*W750 * H920mm W2780*D870*H1330mm(Heater) W620*D560*H1100mm(Filter Fans)

What you can see on our MT-TX1807DE/MT-TX1805DE machine:

MT1807DE Adopts Heavy Duty Machine Body(Double stands), net weight is 300kgs, Ensure stable print for long time. Some cheap machine with very simple body to reduce cost, very thin and light, it's difficult to handle heavy media working for long time.

Printer and Heater assemble together:

MEITU DIGITAL INDUSTRY CO., LIMITED

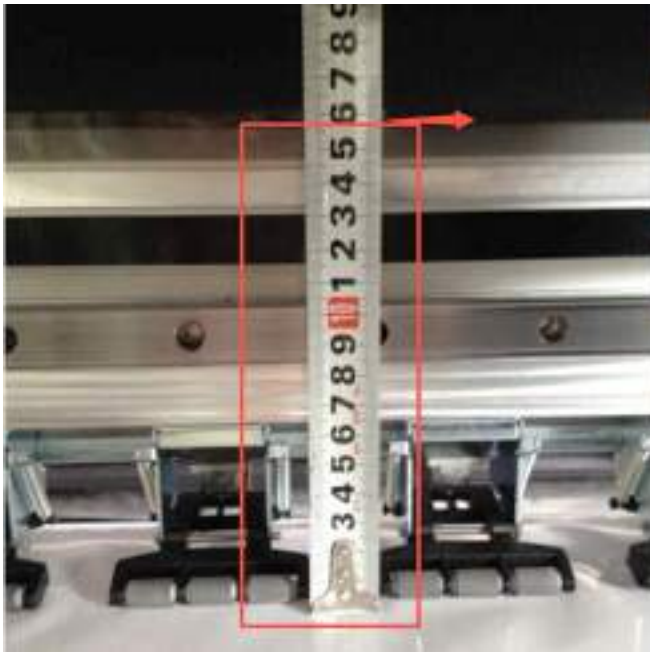

Add: 1F, Building 8A, No.188 Xinjun Ring Rd.,Minhang, Shanghai, 201114,China

Tel: +86-21-52066107*602 Mobile/whatsapp:008613671979064 www.mtutech.com amy@mtutech.com

2. About beam: Our machine adopts good quality stronger and flatter beam is made of one complete length Aluminum profile, margin for error should be **less than 5S** on our machine, so it can ensure machine printing high precision, long life time and printing stability. The beam of other cheap machine is made of Sheet metal bending, It's easy to bend become deformed, the margin for error should be more than 50S, It can't ensure printing precision.

Our machine's:

Some other machine's:

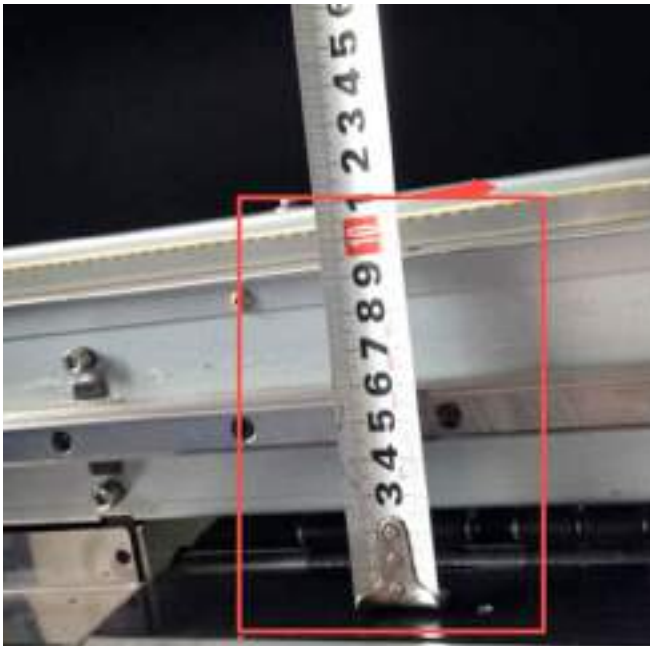

MEITU DIGITAL INDUSTRY CO., LIMITED

Add: 1F, Building 8A, No.188 Xinjun Ring Rd.,Minhang, Shanghai, 201114,China

(Caohejing Hi-Tech Park (CHJ) of Pujiang, Minhang)

Tel: +86-21-52066107*602 Mobile/whatsapp:008613671979064 www.mtutech.com amy@mtutech.com

3. About guide rail: Our machine adopts Japanese **THK 20mm** low noise guide rail with dual sliders, more durable and reliable for high precision print. some cheap machines use Hiwin guide to reduce cost, but THK guide is much better than Hiwin guide rail.

Our machine's:

4. About belt: Our machine adopts Italy **MEGADYNE Belt** that has strong anti-abrasion force, to ensure its ability to maintain good running at a high load Drive. some cheap machine just use very cheap belt to reduce cost.

Our machine's:

MEITU DIGITAL INDUSTRY CO., LIMITED

Add: 1F, Building 8A, No.188 Xinjun Ring Rd.,Minhang, Shanghai, 201114,China

(Caohejing Hi-Tech Park (CHJ) of Pujiang, Minhang)

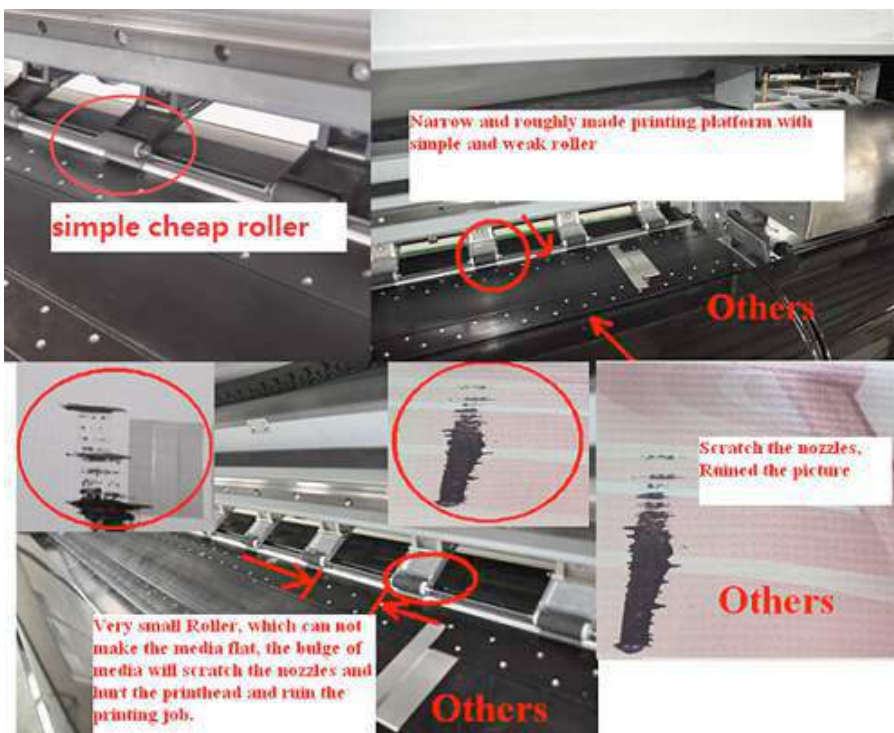

Tel: +86-21-52066107*602 Mobile/whatsapp:008613671979064 www.mtutech.com amy@mtutech.com

6. Our machine Adopts Automatic capping system for easy operation and maintenance. We use high quality capping system. some cheap company just use very simple system and plastic capping system.

Our machine's :

7. Our machine adopts Excellent Germany Igus Data Cables, Designed specifically for making stress-resistant data connections in moving machinery and cable carrying systems, this cable is perfect for preventing severed connections and system shutdowns. **Some cheap machines use very simple flat cable to reduce cost.**

Our machine's:

8. Our machine adopts Continuous ink supply system, Big Bulk ink supply system is optional, you can fill ink by yourself.

9. Our machine adopts ink tank without ink needle, Ink pipe insert into ink tank directly instead of ink needle, it avoid ink tank broken when user change it, It avoid air leaking after ink tank be used for long period.

MEITU DIGITAL INDUSTRY CO., LIMITED

Add: 1F, Building 8A, No.188 Xinjun Ring Rd.,Minhang, Shanghai, 201114,China

Tel: +86-21-52066107*602 Mobile/whatsapp:008613671979064 www.mtutech.com amy@mtutech.com

10. Our machine adopts **Led lights** over the printing platform, so user can printing test and printing quality clearly.

11. Our machine adopts **Anti-collision performance**, When the sensor installed on the both sides of the carriage detect that the position of the print head is lower than the thick medium, the carriage will initiate an immediate stop to protect the print head. Other cheap machines don't have this function.

12. Our machine can use **4 different ink drop**, Droplet size is optional at operation Panel of printer

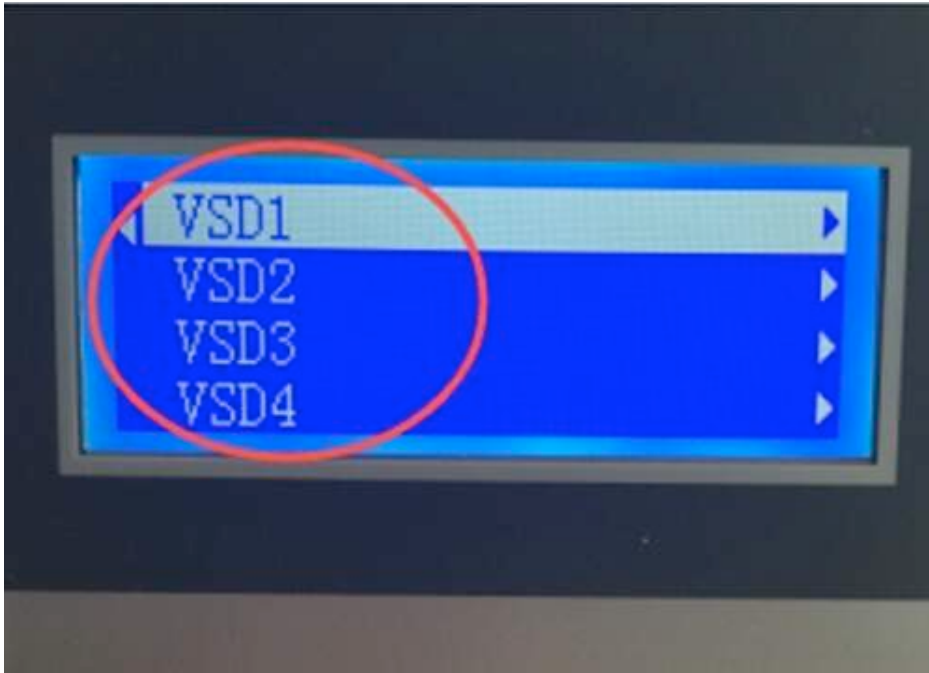

MEITU DIGITAL INDUSTRY CO., LIMITED

14. Adopts **USB 3.0 interface** for better data transfer and anti-signal interference. Most of other machine just use USB2.0 now, it's slow to transfer data.

15. Adopts the latest program **Intelligent Error Auto-Detection** boards , it can guide user to find solution very quickly.

What you can not see, only manufacturer known secrets:

1. Our machine adopts better quality summer beam **is made of 6mm thicker 200*150mm square steel**, that is stronger and flatter summer beam to ensure the platform don't become deformed, then ensure high precision printing and durable. Other cheap machine is made of Sheet metal bending, It's easy to bend become deformed, that's why some platform of machine was badly dented in very short time, it can't ensure printing precision.

Tel: +86-21-52066107*602 Mobile/whatsapp:008613671979064 www.mtutech.com amy@mtutech.com

2. Our machine adopts high precision and long life span synchronizing wheel of **X Y movement system** which is made of the whole piece of aluminum in high precision tools processing center. Other cheap machine use short life plastic synchronizing wheel of X Y movement system.

3. Our machine adopts **19 pieces holder** to support platform flatter and stable, other cheap machine just have 10 pieces or less than 10 pieces.

MEITU DIGITAL INDUSTRY CO., LIMITED

4. Our machine adopts **Japanese NSK long life bearing and screw**, ensure printing stability and high precision for longer life.
5. Our machine adopts stronger and flatter brackets which is planing by high precision milling machine, **Its margin for error should be less than 3S** on Our machine adopts.
6. Refine waste ink tray for fabric direct printing, will ensure waste ink drop into tray and keep fabric cleaning.

Tensile Force System for fabric take-up and feed in system, to ensure fabric well stretched during the printing!
